Model building

Algorithm for building girdle for Octagon cut is improved (Please use *Brilliant* method for Octagon cut).

Reports

Corrected mass in reports

Corrected mass is now displayed in the reports as two values, namely, with 2-digit and 4-digit precision.

Please note that CORRECTED_MASS_2 and WEIGHT_CT bookmarks are not affected by digit precision option, so it has 2 digit precision in any case.

Reported in	Section	Units	Bookmarks
All reports (all cuts)	Top	ct	CORRECTED_MASS_2 (2 digits, previously existing bookmark)
			CORRECTED_MASS_4 (4 digits, new bookmark)

Lower Facet Length for Cushion

Lower Facet Length parameter is added for Cushion cuts.

It is defined as the projected distance from the junction of the main pavilion facets to the corresponding side of the girdle, and reported separately for all four sides.

Crown Main Width and Crown Main Length facets for Cushion

For a non-standard Cushion cut having four Crown Main Width and four Crown Main Length facets, all four individual measurements for their slopes, azimuths, and heights are now reported.

Previous release	Current Release
------------------	-----------------

Radiant and square radiant facet height

Radiant and square radiant facet height measurement is changed:

- In previous release facet height was measured as distance from table to lowest point of facet.
- In current release it is measured as distance from highest point to lowest point of facet.

Bug Fixes

- Table edge calculation in a Round brilliant with extra facets is fixed.
- Girdle height calculation for stones with extra girdle facets is fixed.
- Girdle bezel height statistics for 10x brilliant is fixed.
- "GIA heights" option does not affect on average diameter calculation.
