

February 5th, 2020. Cutwise v.5.0: Release notes

New Features

1. Auto render photoreal media.

First beta version of Photoreal medias generation and metrics calculation to select the best planning solution. Service is available now only for "recut" Cutwise account.

Documentation will be sent later.

<https://cutwise.com/~TCDd>

2. Custom Grading service.

First beta version of Custom products grading for different parameters (Color, Performance, Brilliance, Fire, Shape Appeal). Service is available now only for users with cutwise role "expert".

Documentation (will be updated later): [How to Use Cutwise Color Grading Service Demo?](#)

Your browser does not support the HTML5 video element

3. Collections pairwise sorting.

Collections can be sorted with two pairwise sorting types (full and winner (play-off)). Feature is available now only for users with cutwise role "expert".

Documentation will be sent later.

Your browser does not support the HTML5 video element

4. Customized Cutwise visual widget.

You can select any videos to show them on Cutwise widget, for example:

- only DiBox2.0 Fire Video and ASET Black Photo: [https://widget.cutwise.com/visual/v1/333?sp\[\]=43&sp\[\]=10](https://widget.cutwise.com/visual/v1/333?sp[]=43&sp[]=10)
- or only Color Presets: [https://widget.cutwise.com/visual/v1/333?sp\[\]=64&sp\[\]=53&sp\[\]=38](https://widget.cutwise.com/visual/v1/333?sp[]=64&sp[]=53&sp[]=38)
- or only ViBox 360 media: [https://widget.cutwise.com/visual/v1/333?sp\[\]=1&sp\[\]=2](https://widget.cutwise.com/visual/v1/333?sp[]=1&sp[]=2)

With desired SETUP_PRESET_ID, like 1,2,10,38 and etc.

Media SETUP_PRESET_ID can be found by clicking on image/video thumbnail on stone page and checking sp=N in browser URL or check list of SETUP_PRESET_ID on documentation page: [Cutwise Widget#ListofSETUP_PRESET_ID](#)

Your browser does not support the HTML5 video element

Other Improvements

1. New filters for product catalog.

New look and feel for filters:

- Almost all filters are fitted to one screen.
- Fast filter search (with cmd+F, ctrl+F shortcuts).
- Selected filters indication and fast reset.
- New filters grouping.
- Mobile friendly.

Desktop version:

Your browser does not support the HTML5 video element

Mobile version:

Your browser does not support the HTML5 video element

2. New Cutwise uploader version.

Old uploader version is no longer supported, please download new 2.11.2 version from octonus website (download section): https://www.octonus.com/cutwise/cutwise_web

Starting from version 2.11 Cloud Uploader is using new authorization. Login with Web Cutwise credentials (Login and Password).

3. Autoplay flag for public collections.

`autoplay ()`.

Autoplay can be enabled by default for user's collections (i.e. videos will be played automatically when collection is loaded)

Your browser does not support the HTML5 video element

4. Workshop documentation pages.

<https://docs.cutwise.com/>

5. Bugfixes.
