## HASP key update by v2c file (via browser)

## To apply update (\*.v2c file from vendor), please do the following:

- Plug the HASP key you intend to update to a USB port on your computer (only one HASP key should be plugged; unplug the other keys, if any).
  Run any modern browser (for example, Internet Explorer ver. 9.0 or later, Google Chrome ver. 35 or later).
- Open the page <u>http://localhost:1947/ int /checkin.html</u>.
  Press Browse... and navigate to the \*.v2c file supplied by the vendor.

- Press Apply File.
  If the update is applied successfully, you will get the following message:

gemalto <sup>×</sup>	Sentinel Admin Control Center
Options Sentinel Keys Products	Attach/Update
Features Sessions	Your update was applied successfully.
Update/Attach	License Key with ID was updated. Click ID number link to display the Features list for this License Key.
