

# DiBox 6.x

## 6.1.11

- Recieve processed .jpg and .mp4 files from Cutwise (CutwiseAgent is required)
- There are three options in DiBox during export:

[blocked URL](#)

1. **Upload only** - create diamonds on Cutwise like in current version
2. **Upload and save** - create diamonds on Cutwise and receive .jpg and .mp4 files
3. **Save only** - receive .jpg and .mp4 files, without creating diamonds on Cutwise

## 6.1.7

- Fixed capturing 'table color' data for fancy color lightings ("image is too dark" problem)
- Fixed bug that in some cases HDR images for Fancy Color presets do not generate after the operator captured one or more stones.
- Removed RBC lighting presets.

## 6.1.6

- Fixed HDR results for colorless diamonds

## 6.1.5

- Added specified HDR algorithm for fancy color diamonds. See how to use it [here](#).
