Reports

On this page:

1 Overview 2 Report Folders and Files

Overview

The reports are accessible via the right panel.

- Solutions Report allows comparing solutions by main parameters including ASET and Office pictures. Opens within the system.
- Semipolish Report allows controlling (both visually and via parameter values) a table polishing process. Opens within the system.

• Standard report opens a special panel to view the report within HPOxygen. The remaining options imply the usage of external programs and are grouped under the Export section, which includes:

- · Polish report, also accessible via File Create polished report; includes RTF, HTML, and Interactive 3D reports;
- Comparative report (note that this option is not visible in the Scan mode, and becomes enabled once you have selected exactly two models in the Allocation solutions panel);
- Print Label
- Export Report Data.

See the corresponding sections for more details.

Report Folders and Files

For most reports, paths and file names are the following:

Polish Reports. Now when you click on the right panel, the Polish Report, then, in the Report templates section,

• click the **Open RTF** tab, select the template and run the report, the generated RTF file will be automatically saved as: ...\Documents\OctoNus Software\Polish Reports\RTF**Project Name**\XXXXXXX-**Project Name**-report.rtf

For example, if you run Polish report 3 times for the "Oval blocked 001 ver2.oxgz", you will obtain:
