Video summary: - Sometimes the solutions produced using the “MyRound GIA Facetware + MyRound” appraiser may be just a little below the mass border - The new “MaxMass” profile for this appraiser allows getting solutions overstepping the mass border value but still inside GIA EX boundaries. - This is achieved by weakening the non GIA Facetware criteria which increases the mass but may decrease other parameters. - The “MaxMass” profile does not replace the standard “ModernCut” profile - they exist simultaneously producing different results: the “ModernCut” produces more balanced solutions with higher liquidity; the “MaxMass” - solutions with higher mass and price.
