

# DM Gold 1.1.0.21

Version is available here: <https://www.dropbox.com/s/j8gg3v7s3919iq7/dm-gold-1.1.0.21.exe?dl=0> (Dropbox (OctoNus)\Download\DM\DM Gold\dm-gold-1.1.0.21.exe)

What's new:

- Fixed video playing lags. Now it is possible to stream both from microscope and a video from disk.
- Fixed work on MBox system. If all tuned configs are stored in a DM configs folder, the program will work "out-of-the-box" after installation.
- Added GPU pipeline. This pipeline is set by default to support grayscale cameras.
