## Shared Features

The functionality described in this section is available both in Oxygen Server Microscope and Oxygen Immersion.

Camera FPS Values

Now on the **Camera** panel, the camera FPS values are displayed for hardware (hw) and draw:

Fixed Problems and Improvements

The following fixes for the known problems and improvements have been implemented:

- Some fixes have been done resulting in system stability and speed.
- Previously the system had an expiration period starting from the distributive creation date, after this period the system could not be started. Now, this limitation is removed.
