Your browser does not support the HTML5 video element				
Video summary: - The same parameter of a stone can be graded differently depending on how the Facet Types of cutting for this stone are defined. - Therefore, if you control Facet Types, in some cases you control the cut grade. - You can control the Facet Types of the scanned or rebuilt model by using your own model as a sample. - Set the desired Facet Types for your sample, then use this sample during scanning or rebuild and the Facet Types will be automatically transferred from the sample to the created model.				
Video keywords: cut grade, facet types, sample
