

2021-05-05 - Cutwise 5.6

Here you can find information about what is new in Cutwise version 5.6

On this page:

1. New Features

1.1. Working with HP Carbon Allocation Plans in Cutwise.

1.1.1. DZ-Lite and Fancy Color Estimation and Photoreal Rendering.

1.1.2. Support Estimation of Mixed Data From HP Carbon (Fancy Color + DZ-Lite).

1.1.3. A separate section to manage all HP Carbon projects.

1.1.4. Start rendering for all solutions in project.

1.1.5. New features in SmartRecut, AnyCut projects view.

1.1.5. Share Access for Projects.

2. Improvements and Bugfixes

2.1. Optical Performance Scores.

2.1.1. Face-Up Fluorescence Color Evaluation.

2.1.2. View for Lab Fluorescence Color

2.1.3. Filter for Face-Up Fluorescence Color and Lab Fluorescence Color.

2.1.4. Optical Performance Grades Relative to Diamond Shape.

2.2. Automatically Find the Starting Position in Color Grading.

2.3. Registration by Email.

2.4. Product Status on Diamond Pages.

2.5. Bugfixes

1. New Features

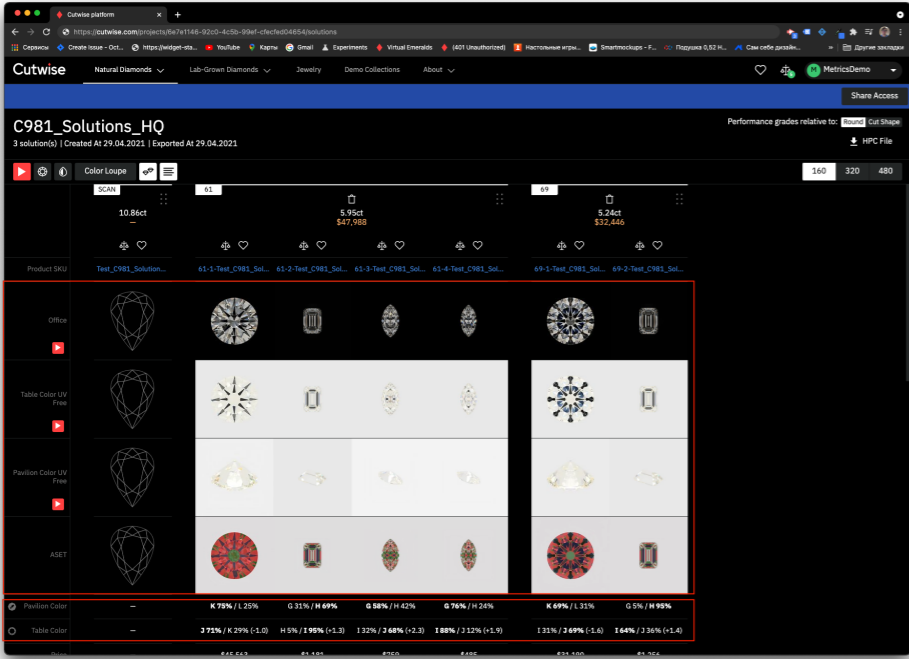

1.1. Working with HP Carbon Allocation Plans in Cutwise.

1.1.1. DZ-Lite and Fancy Color Estimation and Photoreal Rendering.

Estimate the DZ-Lite or Fancy Color project in HP Carbon, upload selected solutions to Cutwise and get:

1. DZ-Lite Estimation.

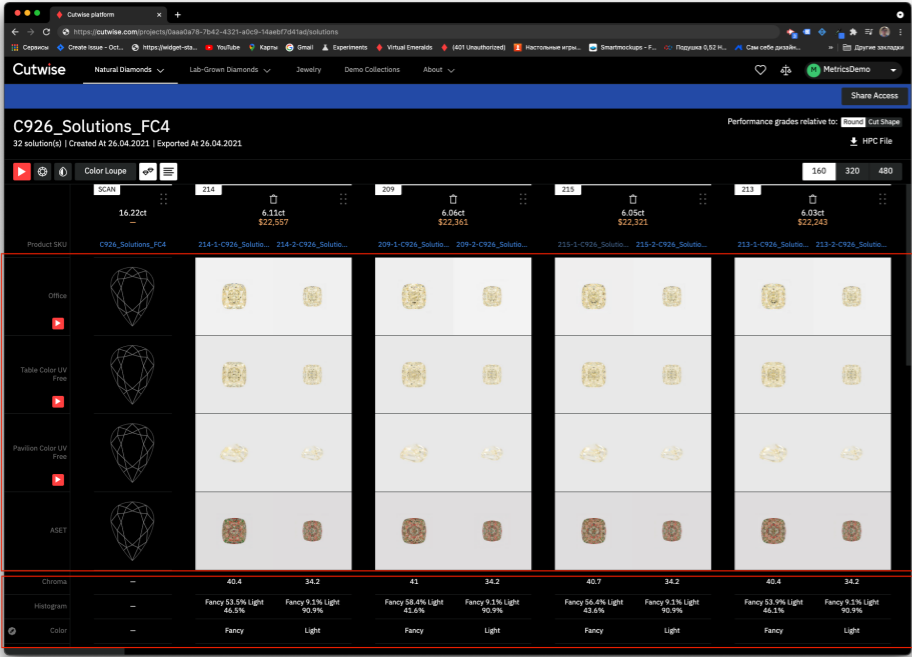

2. DZ-Lite Photoreal Media (Fire and Office Photo and Video, Table Color Photo and Video, Pavilion Color Photo and Video, ASET white, ASET black and h&a photos for round cuts).

Demo example: <https://cutwise.com/projects/8ff9f226-898b-4801-bf43-e9a12ca7d3cb/solutions>

3. Fancy Color Estimation.

4. Fancy Color Photoreal Media (Fancy Color Office Photo and Video, Table Color Photo and Video, Pavilion Color Photo and Video, ASET white and ASET black photos and H&A photos for round cuts).

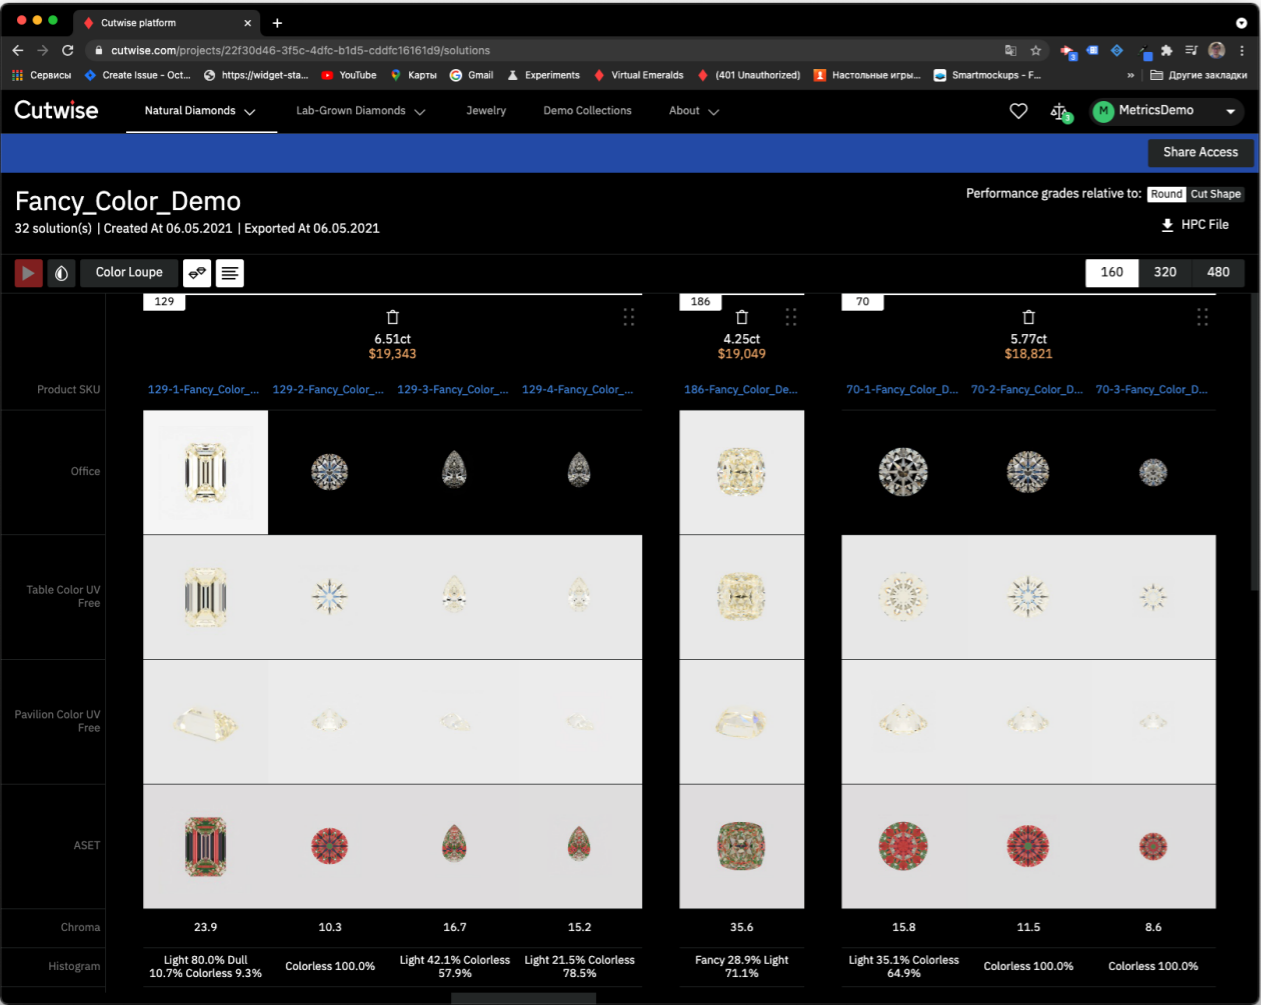

Demo example: <https://cutwise.com/projects/22f30d46-3f5c-4dfc-b1d5-cddfc16161d9/solutions>

1.1.2. Support Estimation of Mixed Data From HP Carbon (Fancy Color + DZ-Lite).

Cutwise supports HP Carbon Prjects with mixed solutions (Fancy Color and DZ-Lite Estimation). Feature in HP Carbon - [Color Estimation Auto Start of DZ Estimation](#)

Users can view mixed projects containing Fancy Color and DZ-Lite solutions now:

1.1.3. A separate section to manage all HP Carbon projects.

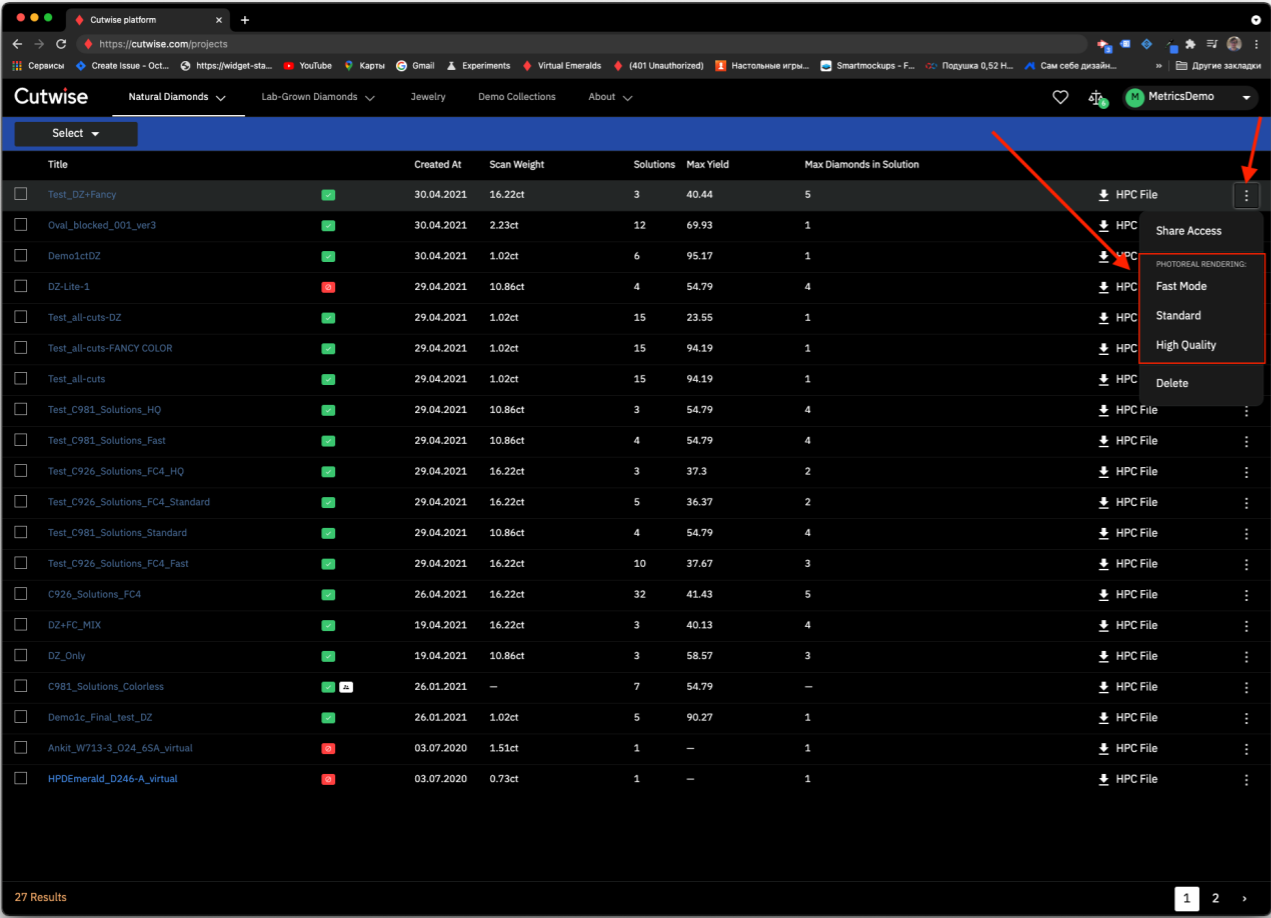

- The service is available in beta-testing mode.
- We accept suggestions for improvements of the "Projects" section.

All Projects loaded from HP Carbon are shown on Projects page:

Your browser does not support the HTML5 video element

1.1.4. Start rendering for all solutions in project.

To start one of the rendering modes for the entire project, a launch button was added to the projects list page:

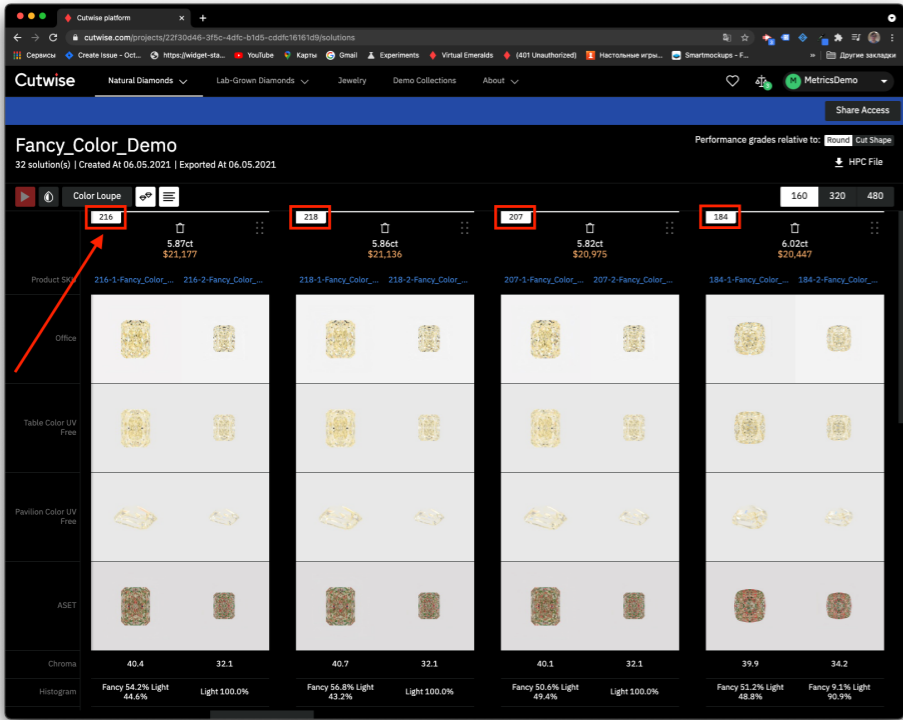

1.1.5. New features in SmartRecut, AnyCut projects view.

- The service is available in beta-testing mode.
- We accept suggestions for improvement and development of the "Project with Solutions" section.

1. The solution number is shown (exactly the one specified in the project in HP Carbon).

2. Users can change the size of the media.
Your browser does not support the HTML5 video element

3. You can drag and drop solutions to change manual sorting.
Your browser does not support the HTML5 video element

Notes

Media sorting and size settings can only be saved by the link. For example:

Project with default sorting: <https://cutwise.com/projects/22f30d46-3f5c-4dfc-b1d5-cddfc16161d9/solutions>

Project with modified sorting: <https://cutwise.com/projects/22f30d46-3f5c-4dfc-b1d5-cddfc16161d9/solutions?sort=DOLDfVrAs1VDsj78HkYDUXAbseO3C0k7TMEEINZbuo1vfdRdt7meHRzDcP7EsWP2uqRMTb09HjxOTXMqhzvOhG2nHvPRS9zmCA96sENVtzeGCjoXFM4KhEMmIZREtb1d>

1.1.5. Share Access for Projects.

Currently, you can grant permissions for Projects via the following pages:

- 1. **Project page.** Permissions for the current project are managed here.

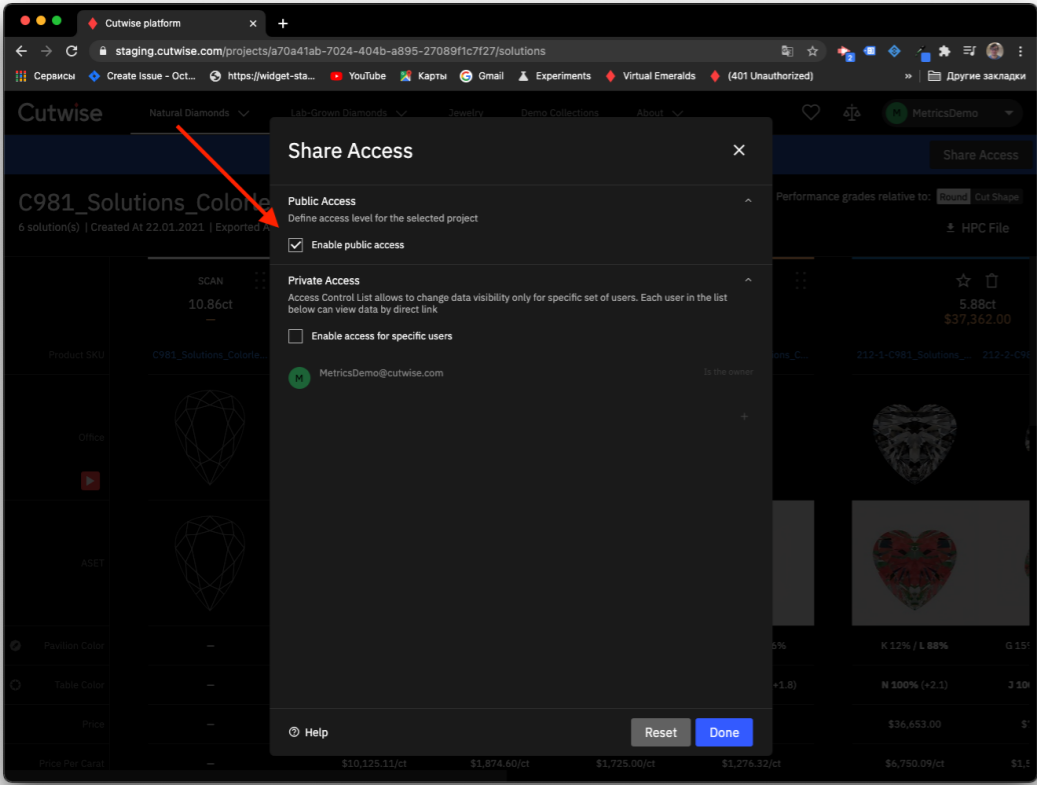

2. List of Projects

When a you click the **Share Access** button, the window for managing access to selected project is displayed.

Public Access

Video Tutorial:

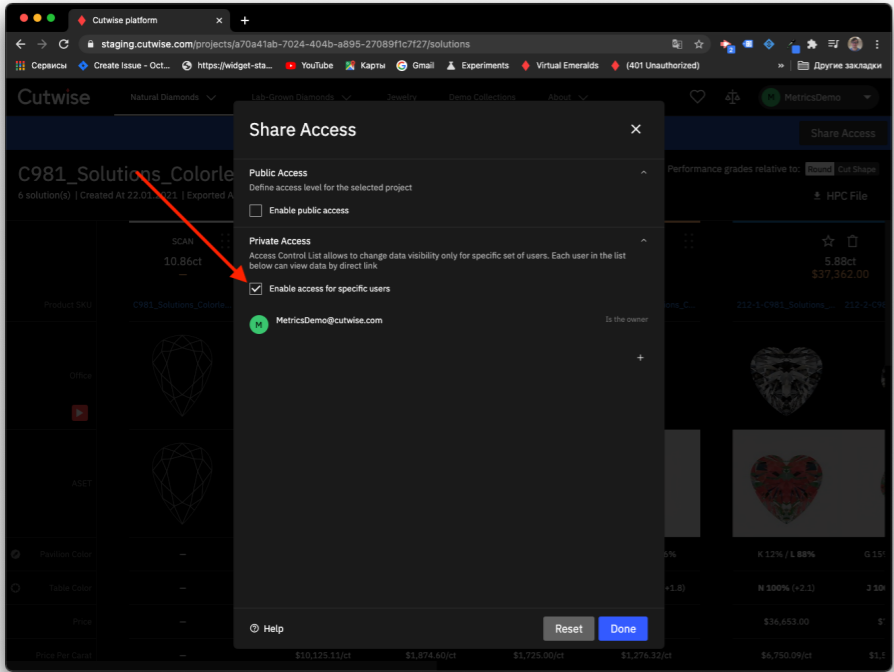

Your browser does not support the HTML5 video element

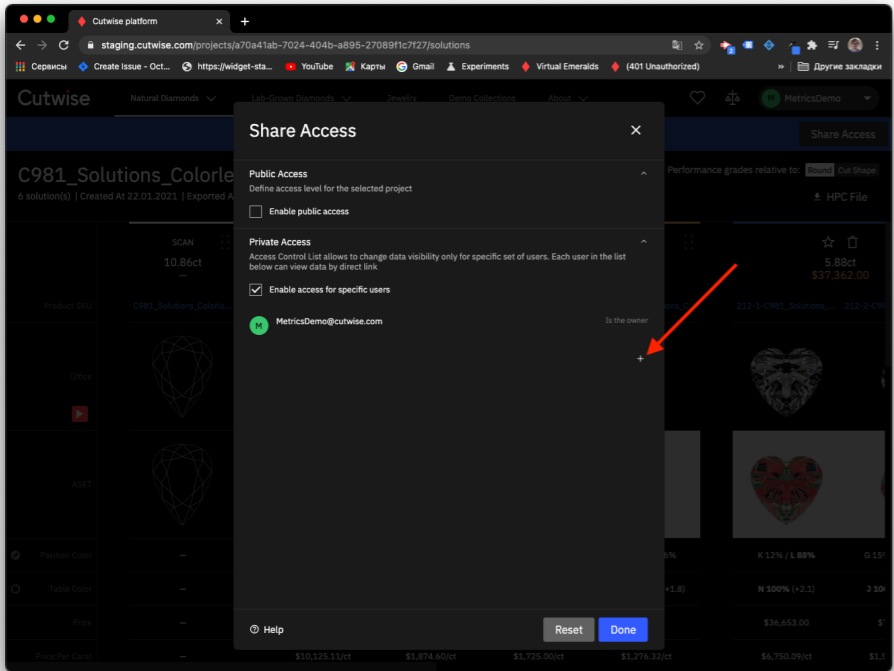

Private Access to projects for registered Cutwise users is now working like [products Share Access](#).

For example, you can allow access only for individual users. To do this, follow these steps:

1. Select the **Enable access for Specific Users** checkbox (later on you can quickly remove the provided access even if it was granted to many users).

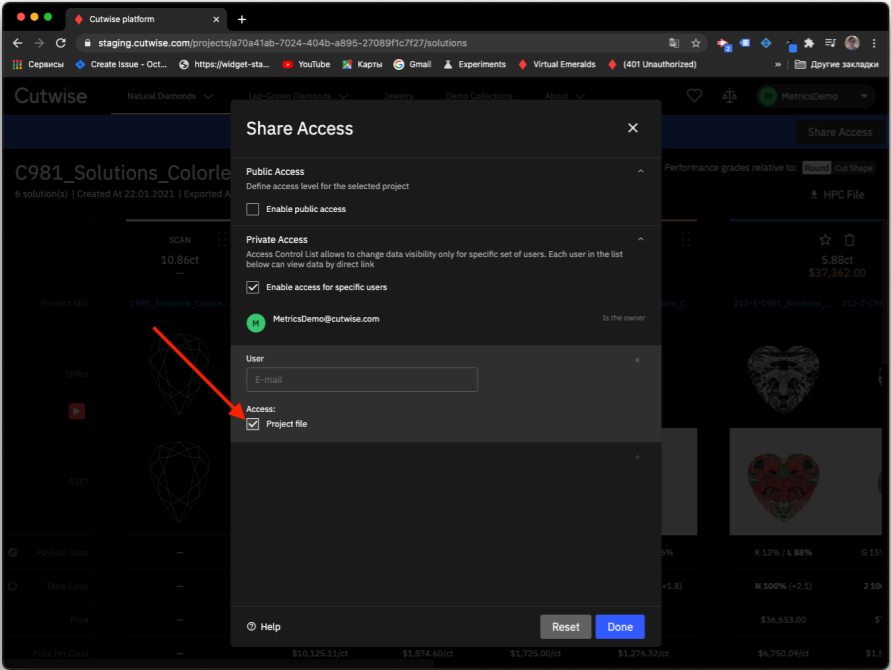

2. Click the “+” symbol, and specify the email address of a registered Cutwise user.

This is a temporary limitation. In the future you will be able to specify any user, but currently this should be a registered Cutwise user.

3. Specify whether the user should be provided with permission to access the HP Carbon project file (ox2z).

4. You can specify any number of users to have access to the projects

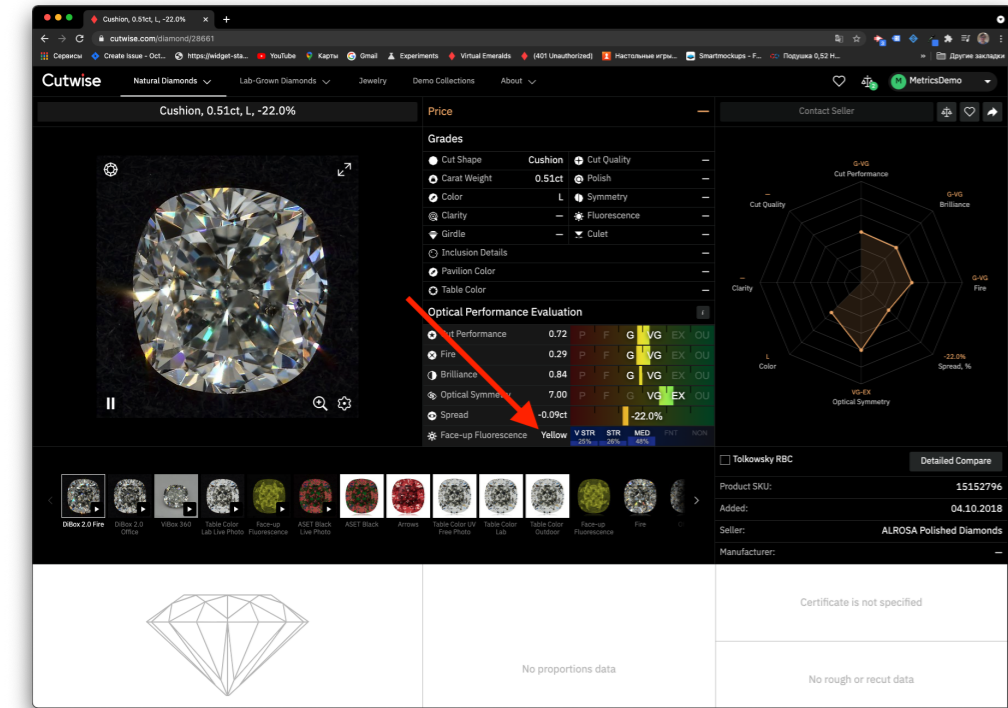

Your browser does not support the HTML5 video element

2. Improvements and Bugfixes

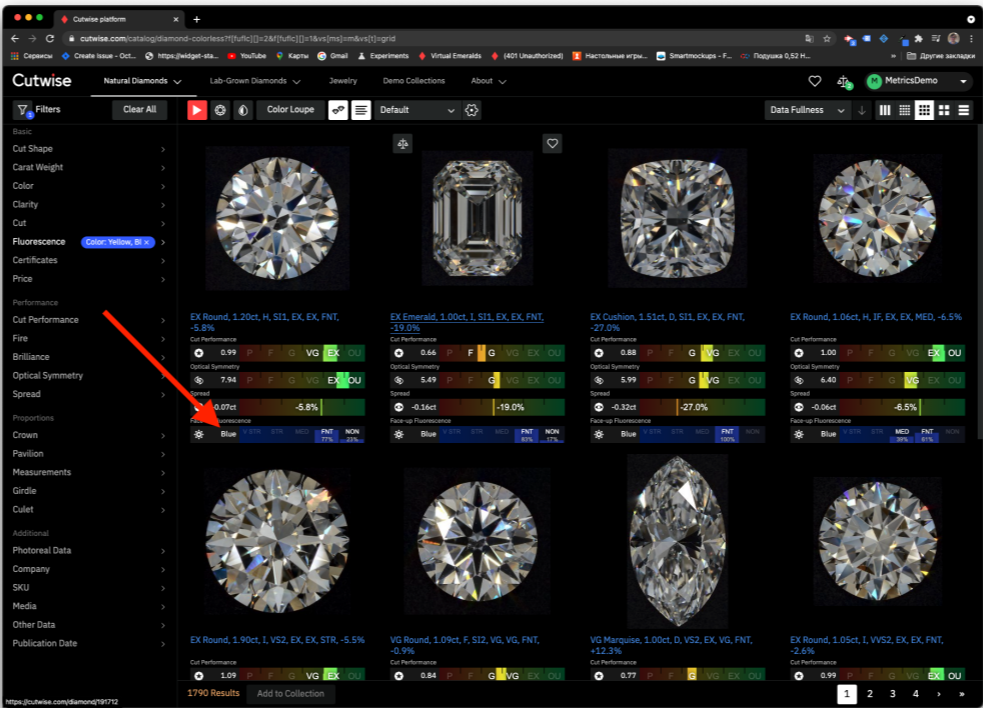

2.1. Optical Performance Scores.

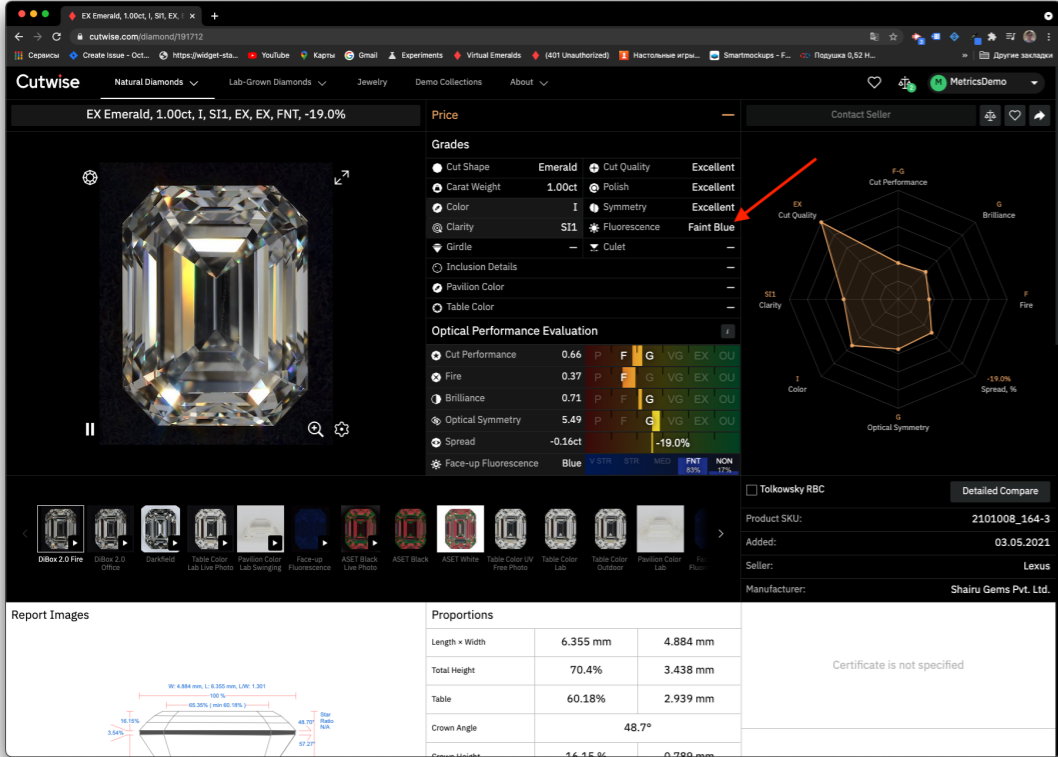

2.1.1. Face-Up Fluorescence Color Evaluation.

The product, collection, comparison, and listing pages now display Face-Up Fluorescence Color evaluated automatically from DiBox 2.0 data.

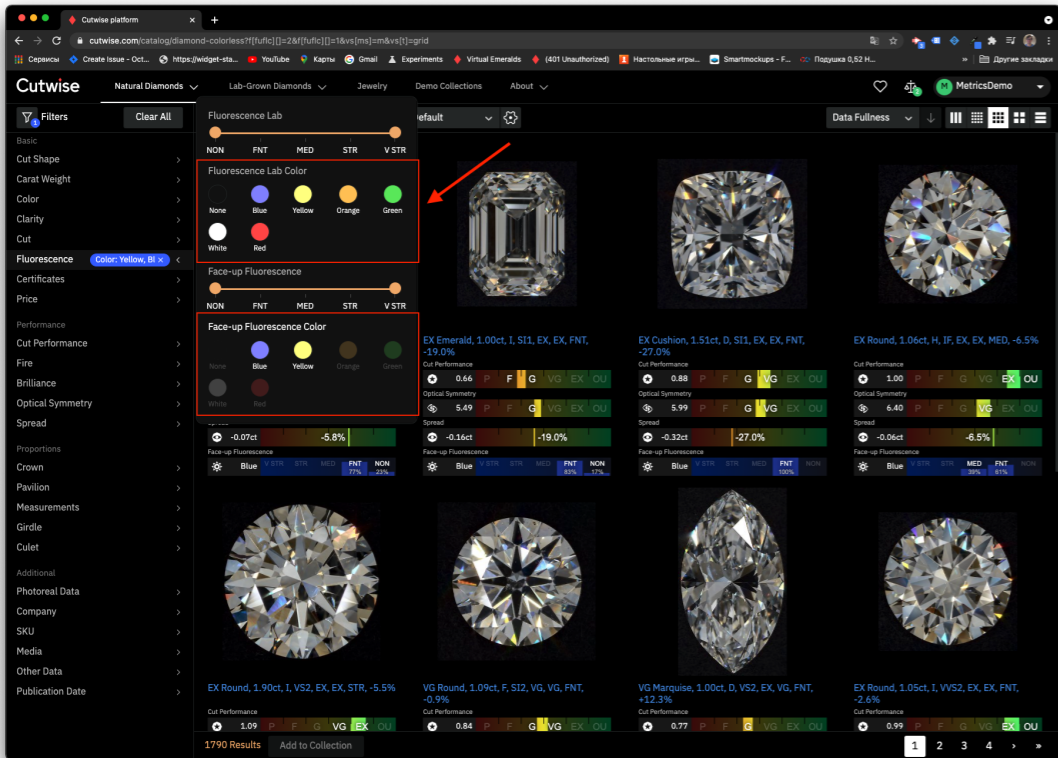

2.1.2. View for Lab Fluorescence Color

2.1.3. Filter for Face-Up Fluorescence Color and Lab Fluorescence Color.

Clients can filter Face-Up Fluorescence Color and Lab Fluorescence Color.

2.1.4. Optical Performance Grades Relative to Diamond Shape.

This feature is available in Public Collections and ReCut Projects. Performance grades can be switched between shape-relative and round-relative for all diamonds in collection and project with special button.

2.2. Automatically Find the Starting Position in Color Grading.

Now, at the beginning of grading, the system automatically detects the color of the stone and puts it in the desired position on the scale. The operator only needs to double-check and set the desired grade.

G Color:

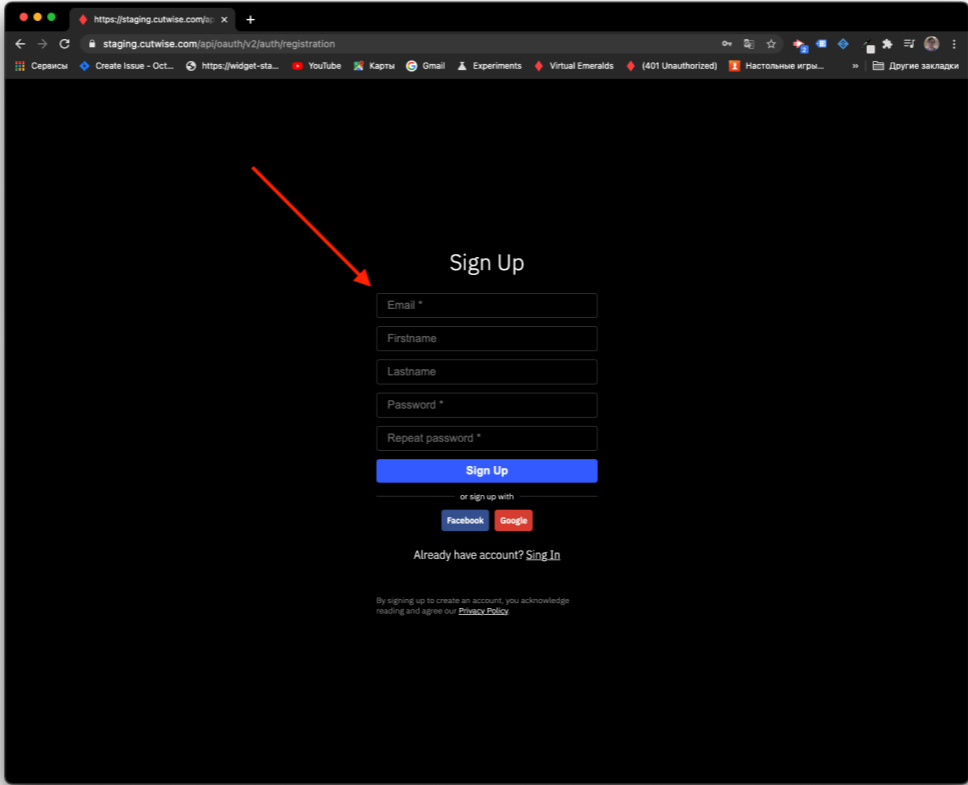

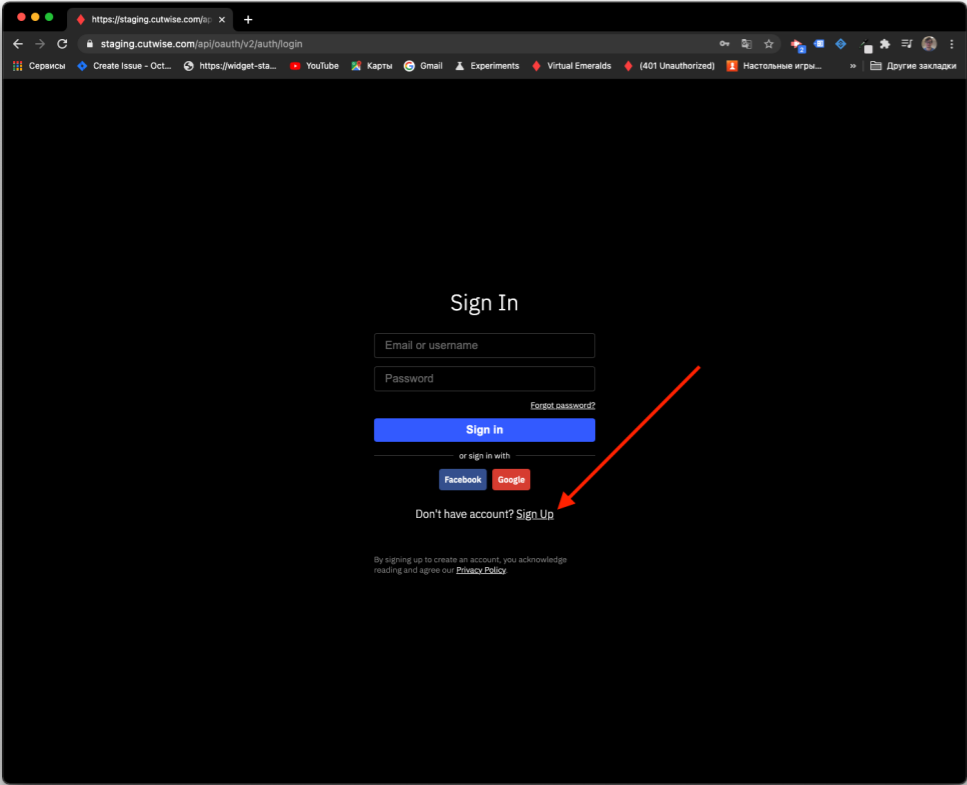

I Color:

! Color grading field is not recorded if user is not the owner of the diamond!

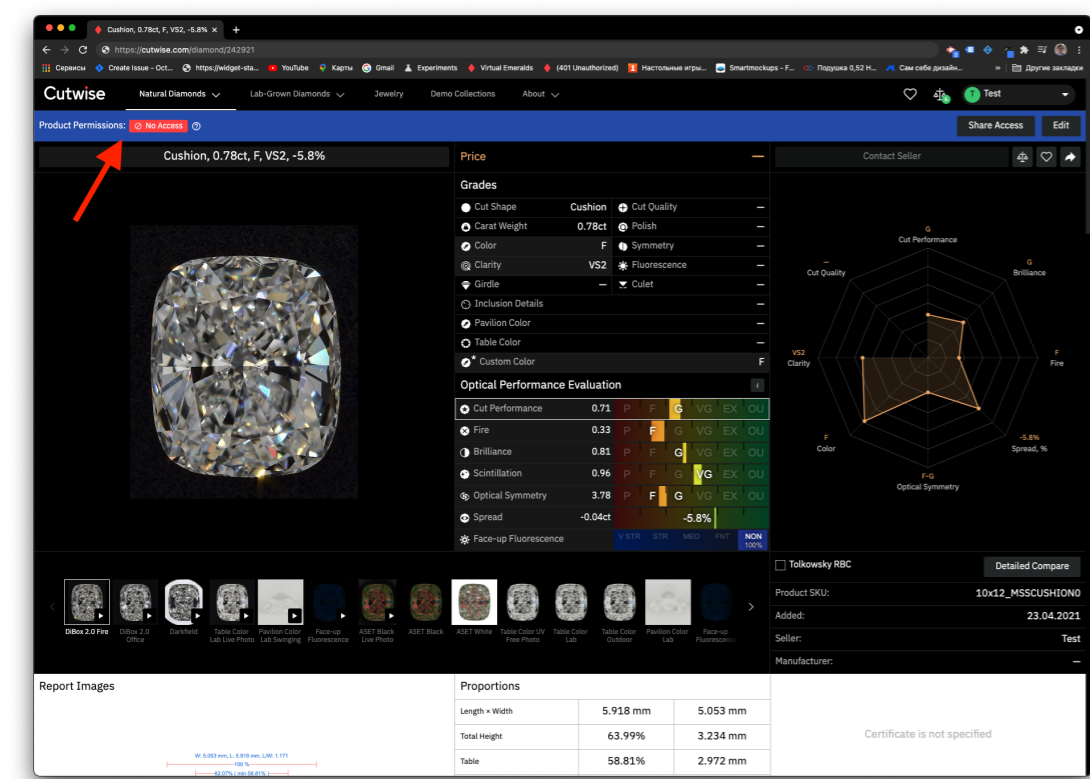

2.3. Registration by Email.

Clients can register and restore password by email.

2.4. Product Status on Diamond Pages.

For owners, the visibility status is displayed on the product pages.

2.5. Bugfixes
