

# 2020-09-17 - HIG Carbon 1.0.8

Here you can find information about what is new in HIG Carbon version 1.0.8.

On this page:
<div><div><div>1</div><div>Carbon Platform - NEW</div></div><div><div>1.1</div><div>HASP Protection</div></div><div><div>1.2</div><div>New File Format - OX2Z</div></div></div> <div><div>2</div><div>Fixed Problems and Improvements</div></div>

## Carbon Platform - NEW

Now HIG uses a new *Carbon* platform. Comparing to its predecessor (*Oxygen*) platform, the Carbon platform provides:

- Improved HASP protection
- OX2Z file format support

### HASP Protection

The HASP (*Hardware Against Software Piracy*) protection has been further improved. This requires an upgrade:

- If you own the key version 4.x, its software part requires an upgrade.
- If you own the key version 3.x, you need to physically replace it with the 4.x with the latest software.

If you need anything mentioned above, please, contact your supplier of software or [Octonus Support](#).

How to detect what key you have:

HASP 3.x	HASP 4.x
	
No "silver eye".	Has a "silver eye".

### New File Format - OX2Z

HIG now opens:

- OX2Z (Carbon) files
- DMX files

The previous versions of the system cannot open OX2Z files.

HIG now saves projects as:

- OX2Z only

Into the currently opened project, HIG can import from:

- OX2Z only

Currently, you cannot export from the opened project.

## Fixed Problems and Improvements

- Some minor problems were fixed and minor improvements were made.
