- Solutions Report allows comparing solutions by main parameters including ASET and Office pictures. Opens within the system.
- Solutions Report allows comparing solutions by main parameters including ASE1 and Office pictures. Opens within the system.
 Semipolish Report allows controlling (both visually and via parameter values) a table polishing process. Opens within the system.
 Standard report opens a special panel to view the report within HPOxygen. The remaining options imply the usage of external programs and are grouped under the Export section, which includes:
 Polish report, also accessible via File Create polished report; includes RTF, HTML, and Interactive 3D reports;
 Comparative report (note that this option is not visible in the Scan mode, and becomes enabled once you have selected exactly two models in the Allocation solutions panel);
 Print Label

- Export Report Data.

See the corresponding sections for more details.

Report Folders and Files

For most reports, paths and file names are the following:

Polish Reports. Now when you click on the right panel, the Polish Report, then, in the Report templates section,

• click the **Open RTF** tab, select the template and run the report, the generated RTF file will be automatically saved as: ...\Documents\OctoNus Software\Polish Reports\RTF**Project Name**\XXXX\XXXX-**Project Name**-report.rtf

For example, if you run Polish report 3 times for the "Oval_blocked_001_ver2.oxgz", you will obtain:

If you select the Open HTML tab:

...\Documents\OctoNus Software\Polish Reports\HTML\Project Name\XXXX\files of the report
