

# Stereo Viewer 4.8.18.69

Version is here: <https://www.dropbox.com/s/xiz9duxjjzh9myu/dm-osv-setup-ver-4.8.18.69.exe?dl=0>

## What's new

- [Supported work with various autostereoscopic displays](#). Configs for some of them are included to the OSV installer: for 8.9" 05F, 13" 05D, 13" S1D, 27" 05G. For others a viewmap bitmap and autostereoscopic\_display.xml should be setup manually.
- [Supported several command line options](#):
  - --fullscreen - to open specified media in fullscreen mode
  - --fit-view - to open specified media fitted to the widget container
- Fixed OSV work after installation with checked 'Virtual reality plugins' and unchecked 'Video streaming presentation features (HASP key required)'. Now if 'Virtual reality plugging' is selected to install, the 'Video streaming' pack will be installed regardless its selection in installer.
