2. New Cutwise Prices

In the course of its market progression Cutwise is ready to start an automated billing service. Correspondingly, the service puts some fees down, becoming an even more attractive promotional and communication tool for the market players.

So, please, note these key matters:

1. **Some fees go down.** For example, 360 videos upload fees are down more than 50%, and DiBox 2.0 hosting is 20% less now.
2. **New CutEvolution prices.**

- 3. Clear Hosting fees system.** With the new service fees system, clients make one-time payments for initial upload and optionally for scores calculations; the first month of hosting is free for every type of data. Further, starting from the second month, hosting fees are written off the client's balance for each product (data storage and traffic). As a rule, the more data you store the more you have to pay; however, there are nice discounts for the full set of data.
- 4. Automated billing system.** Cutwise balance can be seen real-time on the new Balance Dashboard. Balance replenishment notifications will come two weeks in advance.

For more details, please, check:

<https://pricing.cutwise.com/>

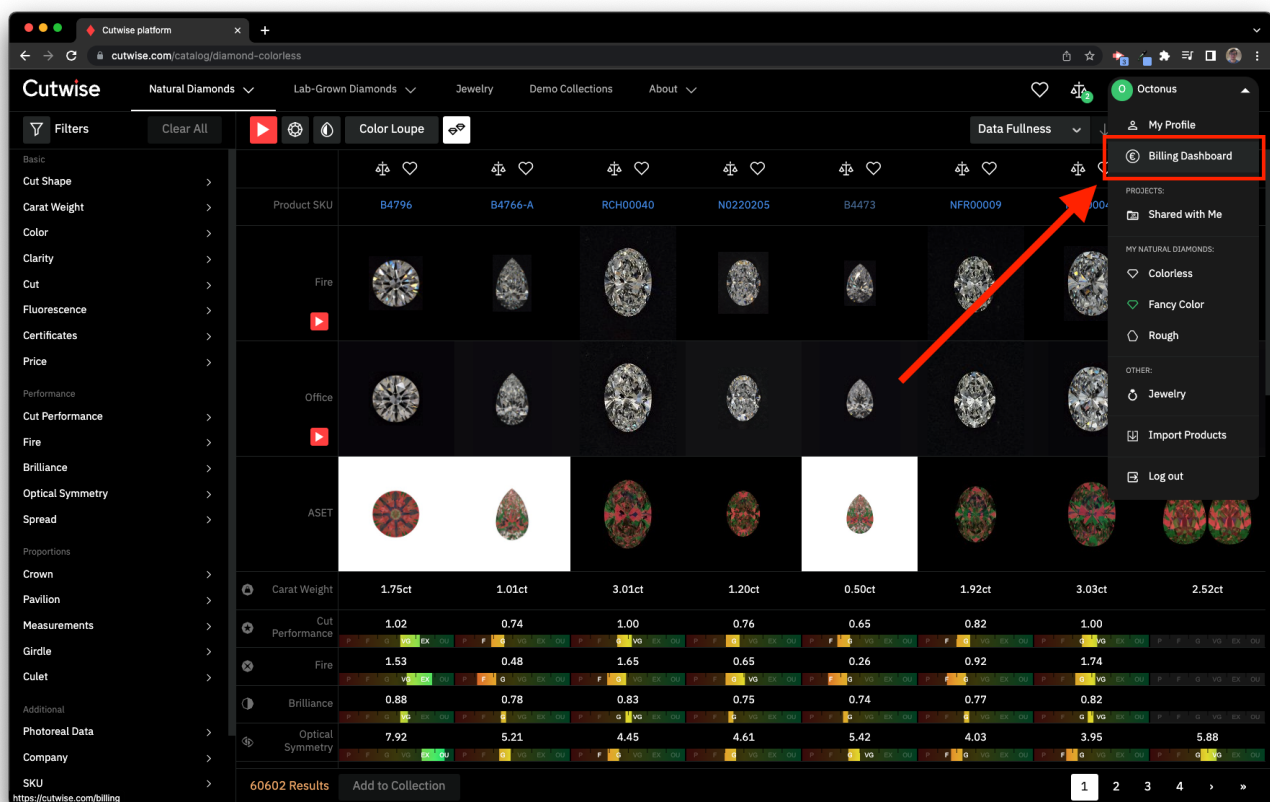

2.1. Automated Billing System (Beta Testing)

The automatic billing system is currently in beta testing mode.

We can provide access to the system upon your request and make changes to the interfaces and improvements to this system based on your feedback.

Link to Billing Pages

Billing Dashboard

Dashboard page created for view and control the current balance and expenses. The page contains information about:

- Current Balance
- Hosted Stock - information about the current products that was uploaded and not deleted from Cutwise and the cost of hosting for this products.
- Summ Spent - the amount of expenses for the period, with details on services type.
