

2023-04-24 - Cutwise 6.4

Here you can find information about what is new in Cutwise version 6.4

On this page:

1. Cut Evolution Projects Workflow Improvements

1.1 Photoreal mode in CarbonViewer

1.2 I3D mini report is embedded to project page

1.3 New CarbonViewer interface

1.4 Working on two displays

2. Other Improvements.

2.1 NetBox

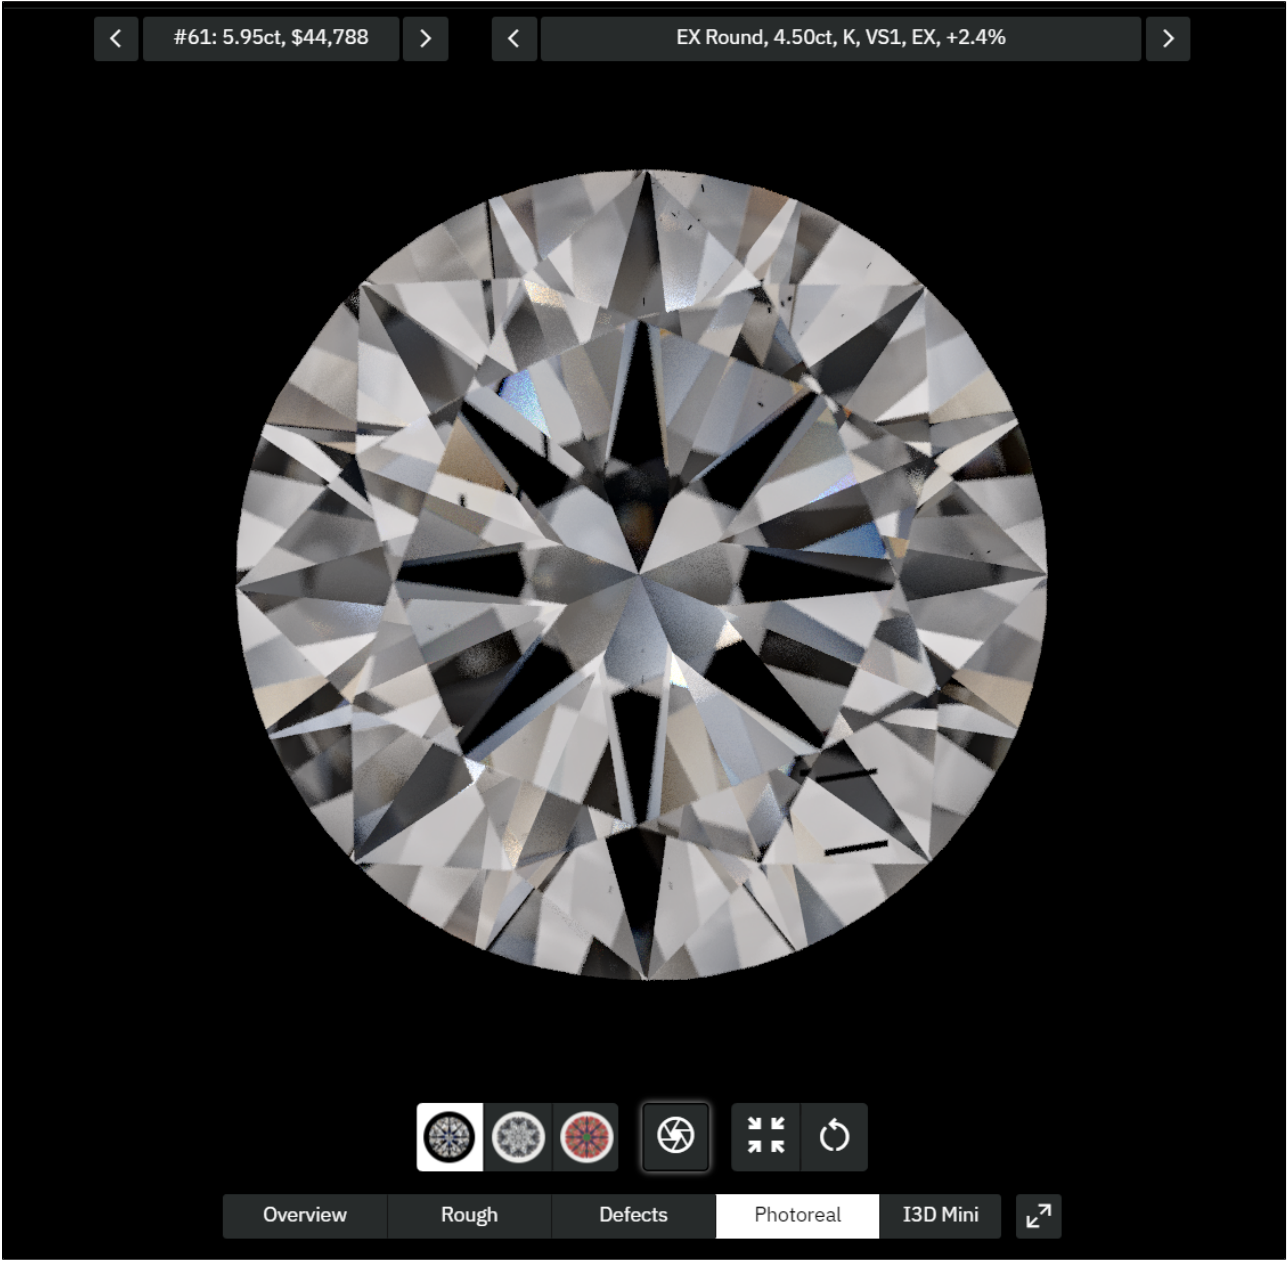

2.2 Photoreal media for Rough

2.3 Server Rendering speed improvements

1. Cut Evolution Projects Workflow Improvements

1.1 Photoreal mode in CarbonViewer

New photoreal mode allows to estimate how diamond will look in different lightings and positions in live mode. Images of a diamond are similar to the ones that are captured in DiBox 2.0.

1.2 I3D mini report is embedded to project page

I3d mini can now be seen in CarbonViewer window for fast diamond proportions and angles analysis

1.3 New CarbonViewer interface

CarbonViewer now has new UI that allows to explore and select solutions more conveniently

Your browser does not support the HTML5 video element

1.4 Working on two displays

CarbonViewer can now work on two displays, simultaneously showing information on all project solutions and currently selected one.

 Two displays are currently working only in Chrome / Edge browsers.

Your browser does not support the HTML5 video element

2. Other Improvements.

2.1 NetBox

An improvement in the performance of Netbox in case of temporary Internet connection loss.

2.2 Photoreal media for Rough

Photoreal preview photo is generated for rough and is shown on project page

	SCAN	4	1	5	3	2
	 7.34ct —  	 2.61ct \$7,254  	 2.53ct \$7,254  	 2.50ct \$7,254  	 2.42ct \$7,254  	 2.79ct \$5,301
