2014.05.02 - Helium Polish version 5.6.38.1/BrilRecon.dll 1.0.11.1/Report.dll 2.4.17.1

Release contains:

File	Version
HeliimPolish.exe	5.6.38.1
report.dll	2.4.17.1
BriRecon.dll	1.0.11.1

In this version we have fixed following bugs:

1. Bug with Gridle thickness for ASCII models had been fixed in this version. From now correct maximum values are displayed in General information.
2. Model building messages changed to be the same for Pacor software and export\reports:

Was:

Message no	Status on Pacor software	Export as or report
1	Model has small errors	Model built correctly
2	Model has medium errors	Model has negligible error
3	Model has big errors	Model built badly

Now:

Message no	Status on Pacor software	Export as or report
1	Model has small errors	Model has small errors
2	Model has medium errors	Model has medium errors
3	Model has big errors	Model has big errors
