

How to Enable NVIDIA 3D Vision Stereo

The following settings are located in the **NVIDIA Control Panel**. To open the panel you should click right mouse button on the desktop and select the appropriate option from the context menu. Also you can find it in the **Control Panel**.

Step-by-step guide

Enable stereoscopic 3D:

1. Click on the **Set up stereoscopic 3D** (**Stereoscopic 3D** section from the left side);
2. Check **Enable stereoscopic 3D**;
3. Immediately after that will be started the **Setup Wizard**. If it does not, please run it manually by clicking on the **Run Setup Wizard**;
4. Then follow the instructions of the wizard for the final stereo configuration.

Note! *For this you should have 3D Vision wireless glasses which require 3D Vision USB IR emitter or monitor, notebook, or All-in-one PC with built-in 3D Vision IR emitter. Also you should install the latest NVIDIA Graphics driver with pre-connected this equipment.*
