

# White frame in the DM software

## Problem

You see a white frame with either lighting and exposure settings.

## Solution

Probably on your computer is used integrated graphics or/and the main graphics card driver is not installed.

Please follow these steps:

1. Quit the DM application;

2. Install the driver for graphics card;

3. Reboot the system if necessary;

4. Configure the NVIDIA Control Panel

For 3D Vision:

a. [Enable NVIDIA 3D Vision](#)

b. Configure your system for stereo (depending on your hardware):

i. [NVIDIA Quadro + 3D TV](#)

ii. [NVIDIA GeForce + 3D TV](#)

iii. [NVIDIA Quadro + 3D Vision Ready display](#)

iv. [NVIDIA Quadro + Half-mirror multi-display system](#)

For interlaced stereo:

a. [Configure interlaced stereo mode](#)

b. [Activate bold font](#)

5. Start the DM software again.
