

View scaling and shifting

- [Scaling](#)
- [Shifting](#)
- [Discard view scale and shift](#)

Scaling

To scale the shown data inside its view, use any of the following options:

- find on the bottom program panel the section:

Move the slider on the seekbar or select one of predefined zoom values in combobox for scaling.

- press CTRL + '+' for scaling in or CTRL + '-' for scaling out.
- press and keep CTRL and wheel the mouse wheel in different directions for scaling in/out.

You can also automatically fit or fill shown data inside its view by clicking on 'Fit' or 'Fill' button (see picture above).

Shifting

To shift the shown data inside its view, use any of the following options:

- press and keep middle mouse button and move the mouse.
- press and keep SHIFT key, press and keep right mouse button and move the mouse.
- to reset shift:
 - press CTRL + SHIFT + 0
 - or find on the right program panel the 'View Control' section, find on it 'Canvas shift' section and press 'Reset shift' button:

Discard view scale and shift

To discard both scale and shift click on the icon  on the bottom program panel.

To discard only shift press CTRL + SHIFT + 0.

To discard only scale press CTRL + 0.

 All these actions you can do by using program menu 'View > Canvas Scale > ...', 'View > Reset canvas shift'.
