Copying configuration from the old DM version

Previously you had to copy the configuration files manually or use pack/unpack scripts. Now you can do it directly via the GUI app DM.

Step-by-step guide

1. To copy configuration files, use the menu item Tools Copy Configuration... File View CLS DM Tools Help Services Copy Configuration... 2. In the resulting dialog, select the folder where was installed the previous version of DM with all settings for this hardware ❖ Dropbox (OctoNι ^ Name Recent places 31.07.2015 17:01 File folder accessible imageformats 31.07.2015 17:01 File folder leica 31.07.2015 17:01 File folder 31.07.2015 17:01 File folder osgPlugins-3.2.1 31.07.2015 16:57 File folder **L** Desktop platforms
