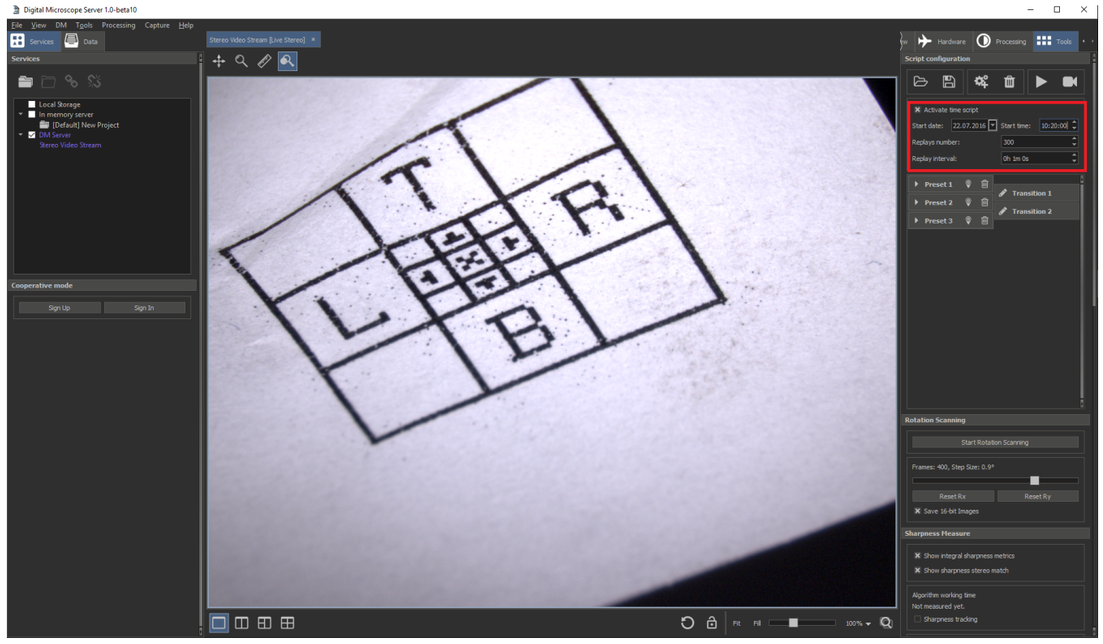
Time macroses

In DM Server 1.0 Beta 10 you may record videos by a timetable that can be set in DM Server GUI:



How to record videos by a timetable?

1. Set a script you want to repeat by a timetable. You may set it by adding presets and transitions or by loading it from file.
2. Check **Activate time script** checkbox
3. Set **start date** and **start time**. At this moment the script will start.
4. Set the number of script repeats (**Replays number**)
5. Set the interval of recording (**Replay interval**)
6. Push the button

After that the script will start capturing videos using the set timetable. All the videos (the total number of videos is equal to **Replays number** parameter) may be find in Movies folder where all captured videos may be found.

To stop video capturing by a timetable push the button

Later these videos may be used for generating timelapse movies from several positions.
