Cutwise v.3.0.0: Release notes

New features

1. Saved Searches for registered users, wish lists, email notifications. Example.
2. Vendor could remove media using stone editing page.
3. Now Vendor can create and edit patented cut shape. Example.

Major bugfixes and improvements

1. First frame use a faceup position for swinging video.
2. New version of Video Player. Prior versions of ViPlayer cannot play updated swinging videos properly. More information.
3. Cutwise fully switched to HTTP/2, media loading performance on the listing page is greatly improved.
4. Problem opening mono video in full screen mode from stone comparison page.
5. Problem with hidden i3D Reports.

Minor bugfixes and improvements

1. Vendor doesn't see the edit button on unpublished stone page.
