## Speadsheet format

Cutwise Import format base on XLSX and CSV format.

Data fields, that are used in Cutwise Product Import (\* - field is required):

[ Stock # \* ][ Type ][ Share Access ][ Shape \* ][ Size \* ][ Color ][ Clarity ][ Key To Symbols ][ Price per Carat ][ Polish ][ Symmetry ][ Cut Grade ][ Fluorescence Intensity ][ Fluorescence Color ][ Laboratory ][ Girdle Finish ][ Girdle Thin ][ Girdle Thick ][ Culet Size ][ Certificate # ][ Fancy Color ][ Fancy Color Intensity ][ Fancy Color Overtone ][ Black Inclusion ][ White Inclusions ][ Open Inclusion ][ Treatment ][ Milky ]

Field name	Acceptable alternate field names	Acceptable field values
Stock # *	ReferenceNum, ReferenceNumber, Stock, Stock Num, Stock_no, StockNo, StockNum, StockNumber, VenderStockNumber	Enter your inventory stock number.  Every media (photo, video, etc) of one stone (product on Cutwise) must have same Stock #.  The number of characters is limited (min=1, max=128).

<b>Type</b>	Type, Product Type, ProductType	<b>diamond</b> <b>rough</b> <b>jewelry</b> <b>lab grown diamond</b>  <i>* <b>diamond</b> type by default</i>  <i>* There are two types of user access, one can be used only for Lab Grown Diamonds and the other only for Natural polished diamonds, Natural rough diamonds and Jewelry.</i>
<b>Share Access</b>	Share Access, Access, ShareAccess, Product Permission, Permission	<b>Restricted</b> <b>Unlisted</b> <b>Public</b>  <i>* <b>Restricted</b> type by default</i>  <i>* <b>Hide All Design Data</b> Cut Data status is set for new products by default.</i>

<b>Open Inclusion</b>	Open Inclusion, Open Inclusions	<b>None</b> = Open Inclusions None <b>OT1</b> = Open Table Small <b>OT2</b> = Open Table Medium <b>OT3</b> = Open Table Large <b>OC1</b> = Open Crown Small <b>OC2</b> = Open Crown Medium <b>OC3</b> = Open Crown Large <b>OP1</b> = Open Pavilion Small <b>OP2</b> = Open Pavilion Medium <b>OP3</b> = Open Pavilion Large <b>OG1</b> = Open Girdle Small <b>OG2</b> = Open Girdle Medium <b>OG3</b> = Open Girdle  Acceptable values are the abbreviated values in <b>bold</b> .  To enter multiple values, separate them with a semicolon ;

<b>Treatment</b>	Treatment, Enhance, Enhancement, Enhancements, Treatments	<b>LD</b> = Laser Drilled <b>IRR</b> = Irradiated <b>CE</b> = Clarity Enhanced, Fracture Filled <b>COL</b> = Color Enhanced <b>HPHT</b> = High pressure high temperature <b>OT</b> = Other (enter any other type of treatment) <b>N</b> = For none, if the stone is untreated  Acceptable values are the abbreviated values in <b>bold</b> .  To enter multiple values, separate them with a semicolon ;
<b>Milky</b>	Milky, Cloudy	<b>None</b> <b>Light (M1)</b> <b>Medium (M2)</b> <b>Heavy (M3)</b>

Cutwise Product Import supports multiple certificates for single product.

Each next certificate can be marked by leading Lab field, like:

Stock #	Lab	CertNo	Lab	CertNo
S1	GIA	123456789	IIDGR	12345678
S2	GIA	987654321		

Cutwise Product Import supports Microsoft Office XLSX and CSV formats.

## Archive format

Archive should be compressed as zip and contains .zip extension.

Archive should contain exact 1 Spreadsheet in CSV or XLSX format.

Certificate files can be added in archive. Each certificate file must be named in format **123456789.pdf**, where 123456789 is certificate number, mentioned in Spreadsheet file.

**Maxium allowed archive file size is 500 Mb.**
