

Cutwise v.3.14.0: Release notes

New features

1. New Cutwise player. What's new:

- Video player is redesigned from scratch with new GUI.
- Progressive video loading. Now video starts playing 5x faster.
- Significantly improved playback speed on mobile and tablet devices.
- The main functions of player can be controlled from keyboard now.
- Enhanced 3D and fullscreen video quality.
- Modifications of video background auto detection.

Some player features can be unavailable until April, 25 while all media in Cutwise will be updated.

Major bugfixes and improvements

1. New metric on Cutwise – Face-up Brightness. Brightness metric calculated on frame with diamond face up position estimates diamond brightness property for most typical geometry condition. This metric doesn't consider pattern fluctuations when tilting.

2. Links to board display presets. You can use one board collection and several links for different view of the board. For example:

<https://cutwise.com/~OD1B> – link to fire metrics view.

<https://cutwise.com/~OD1B?v=xbcY> – link to fluorescence metrics view.

<https://cutwise.com/~OD1B?v=OwcP> – link to brilliance metrics view.

Your browser does not support the HTML5 video element

3. Change StoneID from interface.

SKU for this product was changed. After applying changes, previous link to this product will not be available.
