

DM 1.4.2.40

Version is available at: [Dropbox \(OctoNus\)\Download\DM\dmserver-partial-setup-ver-1.4.2.40-prot.exe](#)

What's new?

- Added multilight mode. It is available when a camera is in free-run mode and while playing or writing a script program. Instructions are [here](#).
- Significantly improved 2D plane scan plugin. Instructions are [here](#).
 - The following is now available:
 - to select a region for high-resolution scanning and stitching,
 - to specify scanning zoom,
 - to scan with the stacking tool.
 - Stitching of captured frames is performed interactively. Stitching progress and intermediate result is displayed to the user.
- Added the ability to remotely control the microscope. Instructions are [here](#).
