March 18th, 2019. Cutwise v.4.2: Release notes

New features

1. New interface for editing and management your product stock.

To go to the new pages click your profile menu and choose needed stock:

Your browser does not support the HTML5 video element

You see three status of products:

- **new** – unpublished, latest loaded products, that have never been published;
- **published** – products available for your clients;
- **unpublished** – unavailable products (for purchased and old products).

Now you can make bulk operations with products (up to 500): Publish, Unpublish, Make Fancy, Deleted and Export info for chosen diamonds:

Your browser does not support the HTML5 video element

Or edit any single product:

Your browser does not support the HTML5 video element

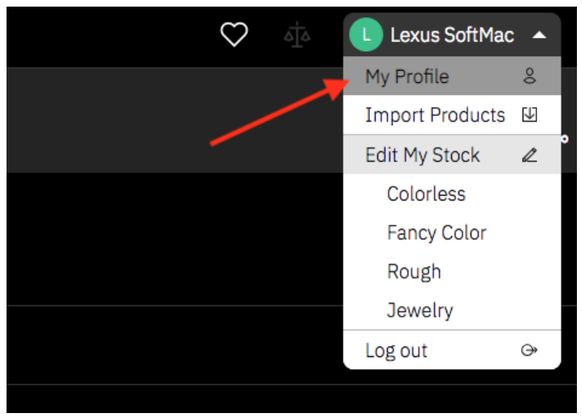
Use filters to select only needed products:

Your browser does not support the HTML5 video element

And use any type of products stock view layout:

Your browser does not support the HTML5 video element

To track the status of your contract go to the Profile page:



Bulk operations doesn't work for Jewelry and Rough stock now. This will be fixed in the next versions.

2. New interface for Import and Export operations.

Now you can export any chosen products and import (add new or update) products with link in profile menu:

Your browser does not support the HTML5 video element

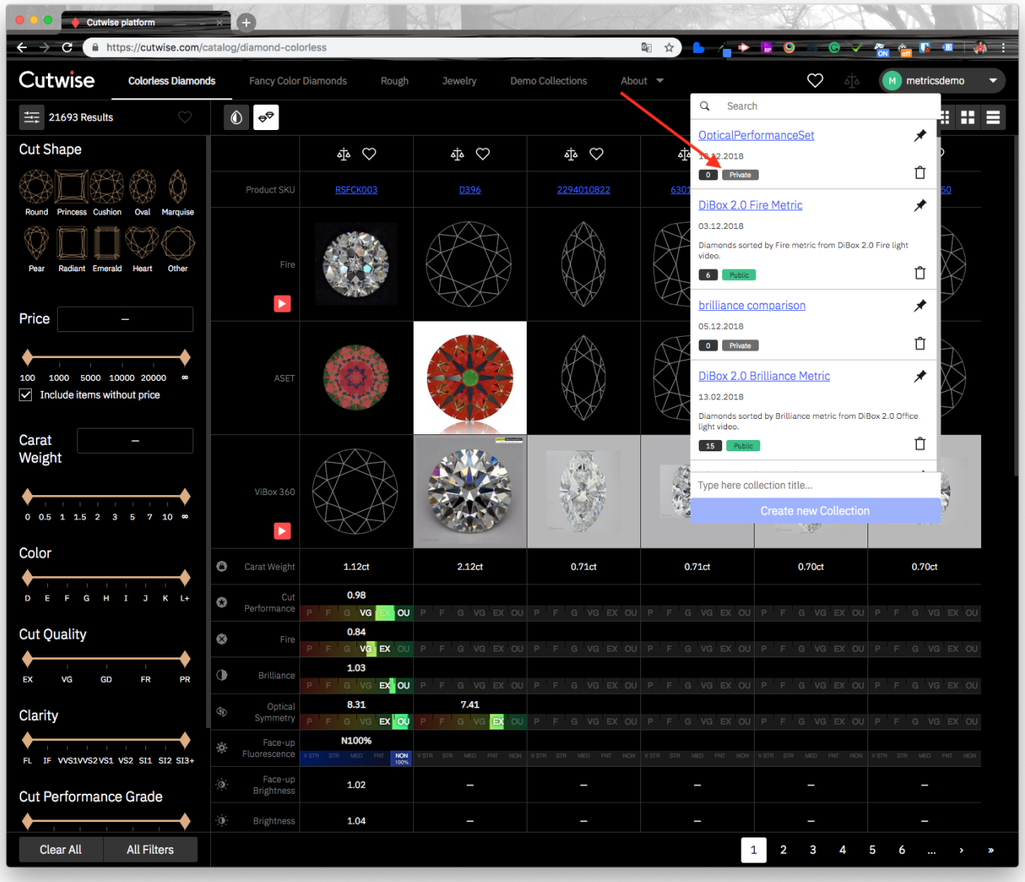
Other improvements

1. The requirements for shooting conditions have become stricter.

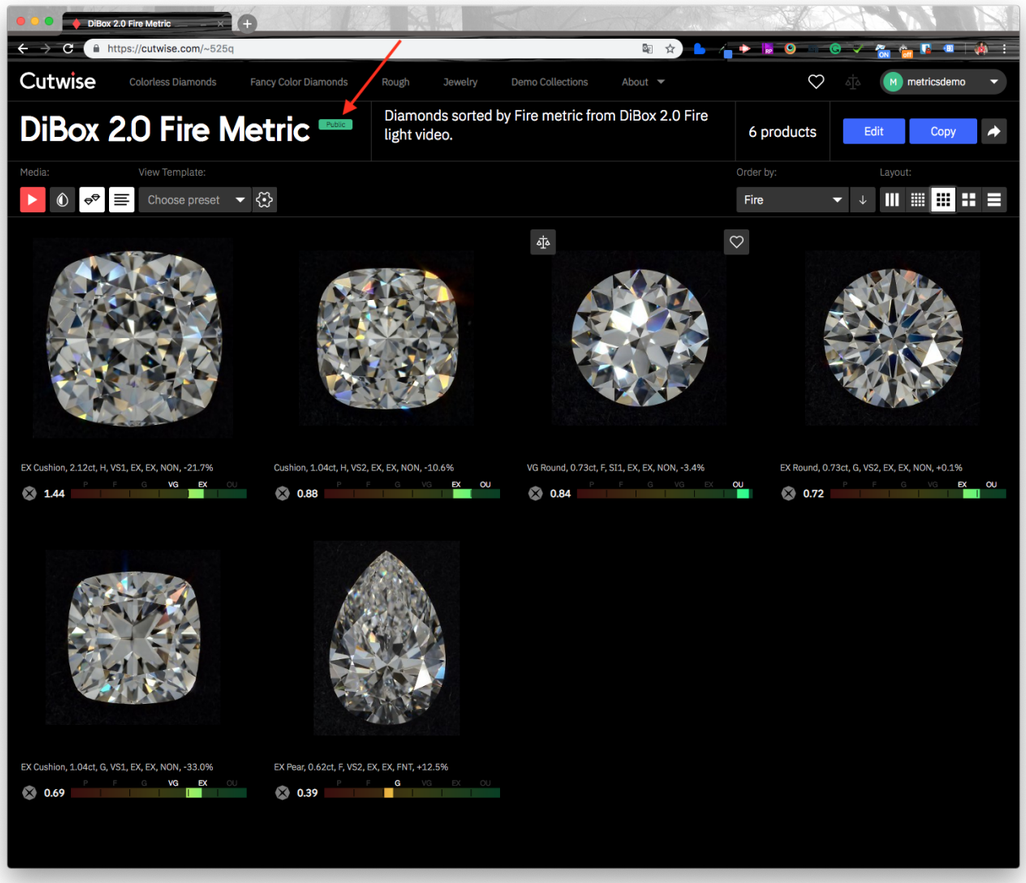
Invalid media will be rejected with an explanation of the non-compliant lighting details.
The following data is accepted:
1) DiBox 1 standard images;
2) DiBox 2.0 standard sets;
3) ViBox videos (360 girdle, 360 pavilion, 8-figure);

2. New labels for tracking status (public or private) of products collections.

For list of collections:



For single collection:



3. New product page and listing page layout.

Your browser does not support the HTML5 video element

4. Cutwise features presentation adapted for smartphones now.
5. Changes in Main menu.
