1.2. Cutwise Widget template for Lab-Grown Diamonds:

<https://widget.cutwise.com/v1/38439?template=media-metrics-v1>

1.3. All Cutwise features (like Optical Performance Evaluation, DiBox data upload, compare, public collections, listings and other) available for Lab-Grown Diamonds section.

Sample collection with Lab-Grown Diamonds:

<https://cutwise.com/~MuS3>

Other Improvements

1. Optical Performance Evaluation explanation on product page

Your browser does not support the HTML5 video element

2. Calculate spread without HPO report

Now, if the diamond hasn't HPO report but has DiBox 2.0 data, spread will be calculated. Spread from DiBox 2.0 is less accurate, it has wider range on spread scale.

Sample of diamond with this spread score: <https://cutwise.com/diamond/38522>

Spread grades are available by default at Product Listing.

3. Bugfixes
